

February 2, 2020

To whom it may concern,

Over the past decade, IPC has been on the lookout for the right WMS software package to compliment our investment in Syspro. Year over year, we reviewed our options to find that the available options did not meet the threshold of improving our business. All of that changed when we discovered DATASCOPE.

Early on in our discussion and evaluation of potential providers we felt that DATASCOPE had the strongest platform to support the growth of our business. Beyond the “bells and whistles” of the software that we enjoy today, we knew they had a team that were experts with Syspro and that we could leverage to help develop best practices in the Distribution Center and throughout our company. They took exceptional care of our team through implementation and continue to support us at a high level every day.

Today, we have been on the DATASCOPE WMS platform for over 6 months and we’re very pleased with the investment thus far. We’ve seen numerous improvements in efficiency and accuracy both inbound and outbound. Our cycle count program is on pace to eliminate the need for an annual wall to wall inventory. Our team of operators has become well versed in the software and our D.C. leadership group is tapping into more advanced functions as we look toward the future. Overall, we’re excited about where we are today, and we have our sights on more improvements in the coming months.

If you are considering DATASCOPE as a WMS partner for your business, you are on the right path. I wholeheartedly recommend them not only for their excellent software but also for their exceptional commitment to the success of the program. Syspro and DATASCOPE together is a winning combination.

Sincerely,

Mike Bowden
Executive Vice President
