To Whom It May Concern:

I am immensely pleased with the DataScope team and the latest implementation/update. My company has worked with many software companies over the years, but DataScope is truly the best.

Our entire compliment of staff members agree that the latest roll out had been executed professionally and above all smoothly. Your staff had been nothing but professional and extremely helpful Thank you for developing such a quality product and listening to our requirements.

Sincerely,

Marinus Carlson
Management Accountant
